

SOPHISTICATION VALUE OF THE PROJECT

"TheProject" is basically a Web based Application, which enables desirous individual to search for an opportunity through our application, and a desirous venture/company to hire the best resource available. This web page aims to reduce the time and hustle of Seekers and Creators .

Some of its features are :-

- Students, Freelancers, Job/Avenue seekers can register on the portal, then they will add their skills, certificates, experiences & will go through various evaluations which would all contribute to rating(or Trust coefficient), a unique feature for employer/avenue creators.
- Employers or Avenue Creators can register on the platform and then search for a candidates according to their requirements.

So, this project aims to attempt a lot of things at the same time with implementation of the newest technologies, which makes it stand between intermediate and hard level of sophistication.

If we as a team had to rate it between 1 - 10 where 1 being the easiest and 10 being the hardest :-
